## **Tips to Prepare Your Child for Primary School**

1. Encourage good reading habits.
  - Reading to and with your child daily for at least 20 minutes will help to improve his reading and literacy skills. Reading helps your child to value books and stories, spark his/her imagination and stimulate curiosity.
2. Develop good habits and routines.
  - To build independence, teach your child how to pack his bag daily. Check that the stationery is in the pencil case, and that he/she has a storybook in the bag. Remove items that may distract him/her from learning.
3. Manage transitions.
  - A new school and new school hours usually mean a new routine. Explain to your child that school hours are longer and there is no nap time. Adjust the sleeping hours to ensure that he/she has at least 9 hours of sleep every day.
  - Do a dry run of the transportation route to and from school. Show him/her where you will be picking him/her up.
  - Build your child's attention span by giving him/her short tasks that last for at least 10 minutes. He/she may practise writing simple words or working on jigsaw puzzles.
4. Develop financial literacy skills.
  - Primary school is when the children start making their own decisions especially about things like the food they eat and what catches their eye at the school bookshop. The concept of using money is also rather abstract for them. Practise using coins with activities at home. Teach him/her how to count.
